

CRISP

CRISP Facilities Newsletter 2017 – December

www.crispmaastricht.nl

Starting December 23rd UM will be closed until January 2nd.
During this period, maintenance work on the building and installations will be done.
In a number of lecture halls recording equipment will be installed.
In Uns50 the water supply system will be out of order due to maintenance work.
As a consequence, Uns50 will be a prohibited area for a number of days.

Opening hours end of 2017:

Friday December 22nd: all building will close at 5.30 p.m. including parking garage Uns40.
Saturday December 23rd until Tuesday January 2nd 2018: all buildings closed.

Employees can gain access at December 27, 28 and 29 between 9.00 a.m. and 5.00 p.m. to Uns60, Deb1, Dub30 and Uns5.
With 24 hours permission, employees can have access to Uns40 and Oxf55 during all days.

Uns50 will be a prohibited area at December 27th, 28th and 29th due to major maintenance work of the water supply.

The other days Uns50 is accessible for employees with 24 hours permit.
For specific research purposes, a permission can be obtained for December 27th and/or 28th.
Between 1.00 p.m. and 2.00 p.m. one can gain access. This will be with an in and out check registration at the reception Uns50.

One can gain this special permission by means of a email request making mention of name, both UMcard numbers, and for which room(s) at what day access is requested,
This email has to be send to J.dolhain@maastrichtuniversity.nl before December 20th.

No access will be granted without this request being done in advance!
Uns50 will be accessible with normal 24 hour permit on December 29th at 1.00 p.m.

Access to the parking lots Uns40 and Uns50/60

Due to Anti pass back it is a necessity to check in and out every time, even if the bar is open.
In case you missed this, you cannot enter or leave the parking lot next time you want to pass the bar. Not following this regime, especially outside of office hours, may cause some serious delay waiting for assistance to either enter or leave.

Employees who have a public transport card or used the opportunity to purchase a bicycle with UM contribution, can have access to the parking lots after 5.00 p.m. and during weekends.

Maintenance 2018

In 2018 major maintenance projects in Uns50 will be carried out.
After the above mentioned maintenance of the water supply, the fire alarm system will be undergoing a major upgrade.
Most of the detector connections must be replaced, which will affect all rooms in Uns50.
The work will take between 30 to 60 minutes per room.
After a completion test, the old connections must be removed, which will again be performed in all rooms. The duration of the project is 6 weeks and is planned to start in week 5.
No exceptions can be made. A more specific planning is expected before December 22nd.

Christmas

It is considered common knowledge that natural Christmas trees and any other natural decorations are prohibited, as they are considered a fire hazard.
