

## How to get access to the VAS Laboratory

- If the (frequent) use of the VAS-lab is necessary (determined after consultation with the chemical administrator), contact the VAS-lab manager to make an appointment. Be well in advanced, because getting access will take some time.
- After approval of your plans and verifying your employment contract, the training can get started.
- The training consists of a guided tour by the VAS-lab manager, a lab-instruction focused on your compound and a practical training under the supervision of the VAS-lab manager.
- After completing the training successfully, UM-card access will be requested.  
(Indefinite employment contract: continuous access, temporary contract: 2 years)
- For access to the research lab/ML-II an additional approval of the Biological Safety Officer is needed.
- Reservations can be done via an outlook request (appointment).
